# Cleaning Checklist for a **DENTIST**

# Cleaning Checklist for a DENTIST

## Reception Area:

- Dust all surfaces, including chairs, tables, and vases
- Vacuum or sweep the floor and any carpets
- Wipe down door handles and light switches
- Empty waste bins and recycling bins
- Disinfect surfaces with appropriate cleaning solution
- Replace magazines and reading materials as needed

## Treatment Rooms:

- Sanitise dental chairs and stools
- Wipe down countertops and any equipment
- Disinfect x-ray machines and other diagnostic equipment
- Replace used gloves, masks, and other protective gear
- Sweep or vacuum the floor
- Restock necessary supplies such as tissues, cotton balls, and mouthwash

## Sterilisation Area:

- Clean and disinfect all tools and instruments
- Prepare sterilisation equipment for use
- Ensure sterilisation equipment is functioning properly
- Replace sterilisation pouches as needed
- Keep an inventory of necessary supplies such as gloves and disinfectant solutions
- Clean and disinfect the counters, sink, and other surfaces in the sterilisation area

## Office:

- Dust all surfaces, including desks, chairs, and bookshelves
- Clean computer keyboards and screens
- Vacuum or sweep the floor and any carpets
- Wipe down door handles and light switches
- Empty waste bins and recycling bins
- Disinfect surfaces with appropriate cleaning solution

## Bathroom:

- Clean and disinfect toilets, sinks, and mirrors
- Restock soap, paper towels, and toilet paper
- Sweep or vacuum the floor
- Empty waste bins and recycling bins
- Wipe down door handles and light switches

By following this checklist, you can help ensure that your dental practice is clean and hygienic for your patients and staff.
